

4.9.08

Version 4.9.08 NetBox® Software for S2 NetBox and S2 NetBox VR Series Products

Version 4.9.08 NetBox software introduces access control support for Allegion Schlage® NDE Series wireless locks, allowing users to manage the locks via S2 NetBox and an IP gateway. Additional updates include intrusion alarm support for DMP XR150 panels and video management system support for OnSSI® Ocularis® 5.3.

Support for Allegion Schlage NDE Series Wireless Locks

Integration with Allegion Schlage NDE Series wireless locks provides the ability to manage the locks from S2 NetBox using an IP gateway and Bluetooth connection.

Lock Control and Management

- Manage NDE Series wireless lock access control and event monitoring functionality without requiring third-party hardware
- Control NDE Series wireless locks using the Allegion ENGAGE™ Gateway and Bluetooth technology
- Use a smartphone for set up with the Allegion ENGAGE app

Easy Installation

- Retrofit NDE Series wireless locks into standard interior doors without drilling additional holes; locks combine a lock, credential reader, door position sensor and REX into a single unit

S2 NetBox hardware must operate on the Ubuntu 14 platform for this integration.

Additional Updates

Intrusion Panel Support for DMP XR150: Manage DMP XR150 intrusion panels through S2 NetBox from the Intrusion Panels page

Video Management System Support for OnSSI Ocularis 5.3: View event video from OnSSI Ocularis 5.3 directly in the S2 NetBox user interface

S2 NetBox Photo ID Badging Migration Status: View status results when migrating to the new S2 NetBox Photo ID Badging System introduced in Version 4.9, as well as access past conversion results

Integration with S2 NetBox enables real-time lockdown in NDE Series wireless locks.

DMP XR150 intrusion panels can now be managed from S2 NetBox.

Version 4.9.08 supports S2 NetVR® and S2 NetBox VR Version 1.8.4. This document describes only some of the release's capabilities.

The following S2 hardware is eligible for upgrade to Version 4.9.08 and later:

- S2 NetBox Enterprise 50/100
- S2 Enterprise Ultra/Select
- S2 NetBox with N2800 processor
- S2 NetBox Extreme with N2800 processor
- S2 NetBox VR
- S2 NetBox VR Quatro

If you have traditional S2 hardware that is not listed here or are not sure how to identify your hardware, please log in to Support Central and view the **S2 *Forward!* Traditional Hardware Identifier** on any S2 NetBox Series Support Page.
